DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19 drawn to a retractable or “pull-out” computer housing structure, classified in class 361, subclass 684.
- II. Claim 20-24, drawn to a guide rail system for mounting on the back of a desk, classified in class 312, subclass 334.32.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility, such as guide rail structure for desk drawers, which does not require a computer housing structure. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

No attempt was made to contact the applicant (Simon Shearman) by telephone to request an oral election to the above restriction requirement, since a telephone was not provided with the as-filed application.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
